2. Signs and Markers

The mine identification signs were observed in place at the Main Facility and 4th East Portal Area. Both signs are situated so that they are at the contact point of public access into the permit area. Both signs contains the required information.

4.c Hydrologic Balance: Other Sediment Control Measures

Silt fence located in one of the storage areas at the 4th East Portal area needs to be replaced. The site has been monitored for several months, but recent wind events has made the silt fence non-functional. The area had already been identified as needing maintenance by company personnel and is scheduled to be replaced this week.

22. Other

Portions of wind fence identified in previous inspections as needing maintenance has been replaced by new material since the prior inspection.
